Minority Owned

## Core Competencies

We offer heavy construction services to commercial and government agencies seeking project management solutions at competitive prices. From delivering a scoop of sand/soil, to providing oversight for an entire construction civil engineering project, our consortium of supplier chain managers and specialty trade contractors deliver excellence. Construction: grading work, excavation, concrete & asphalt, demolition, flood/erosion control, remediation and emergency services.

## Differentiators

Our project managers ensure contract required safety and quality standards have operational process controls that identify performance, schedule, and cost issues before problems occur to provide timely customer feedback.

Our supplier chain management establishes open lines of communication with customer environmental and safety stakeholders to ensure personnel comply with onsite regulations.

We utilize OSHA Job Hazard Analysis forms (i.e., US DOL OSHA 3071) as a component to eliminate and prevent workplace hazards without compromising the project quality, schedule, and/or cost.
